

**ANNUAL PERFORMANCE REPORT
HOUSING INSTRUCTIONS**

The Annual Performance Report (APR) is the tool used to collect performance data from the Office of Community Renewal's Recipients. The data collected from the APR is required by the U.S. Department of Housing and Urban Development (HUD) and is submitted to HUD annually in New York State's Annual Performance Report.

Recipients must submit an APR for each project where a Final Performance Report has not been submitted to the Office of Community Renewal. The Report consists of seven sections: Recipient Information; Project Status Narrative; Project Team, Beneficiary Data and Performance Measurements; Affirmatively Furthering Fair Housing, Section 3 Summary Information, and Certification. Recipients are required to submit beneficiary data and performance measurement data for **each** activity funded **excluding** program delivery and administration. For those projects with more than one activity and meeting different National Objective Compliance criteria (for example, homeownership assistance with housing rehabilitation) a Beneficiary Data/Performance Measurement subsection must be completed for each of the activities. Please refer to the APR Reminder email which includes a listing of the activities and IDIS Activity numbers funded by the Office of Community Renewal. The entire APR must be returned, **including** forms that may not be applicable to a Recipient's grant.

ALL APRs MUST BE RETURNED TO OCRREPORTS@HCR.NY.GOV. PLEASE INCLUDE THE COMMUNITY NAME, CDBG PROJECT NUMBER AND APR IN THE SUBJECT LINE.

ANNUAL PERFORMANCE REPORT HOUSING INSTRUCTIONS

EXHIBIT 1: Energy Star Sets Energy Performance Standards for Building

WHAT IS THE ENERGY STAR BUILDING PERFORMANCE STANDARD?

- For residential single and multifamily new construction up to 3 stories, it is a system for achieving *and* verifying a certain level of performance with respect to energy efficiency.
- Performance is certified by independent third-party contractors

The Energy Star standard is uniform throughout the United States, and a national infrastructure exists for implementation.

- ENERGY STAR is not a new building code, or specification. It does not replace existing energy codes or building codes. “Efficiency” means total purchased house energy consumption, not only heating, cooling and hot water. [New in ‘06]
- An Energy Star home is *at least* 30% more efficient than a comparable home built to meet the 1993 national Model Energy Code or 15% more efficient than state energy code, whichever is more rigorous. See www.energystar.gov for more information, including the new performance guidelines to be applied for most homes beginning July 1, 2006.
- An Energy Star Home/Building is defined as one which has been *certified* through inspection and *testing* as meeting the Energy Star Qualified New Homes Standard. To achieve this rating the building must score less than or equal to 80 in the North (≤ 85 South) on the Mortgage Industry Home Energy Rating Scale (HERS).
- HERS Scores give a numeric value between 0 and 100 indicating the relative energy efficiency of a given home as compared with the HERS Energy-Efficient Reference Home (EERH) as specified by the HERS Council Guidelines. The lower the score, the more efficient the home. A home with zero energy use (total energy consumption) scores 0.

**ANNUAL PERFORMANCE REPORT
HOUSING INSTRUCTIONS**

EXHIBIT 1:
Energy Star Sets Energy Performance Standards for Building

WHAT DO HERS CONTRACTORS DO?

- Review builder's plans for Energy Star performance.
- Evaluate and rate energy efficiency of buildings.
- Provide independent 3rd Party inspections AND testing.

Inspection – The home energy rater inspects the home and, with software, measures its energy characteristics, such as insulation levels, window efficiency, wall-to-window ratios, the heating and cooling system efficiency, the solar orientation of the home, and the water heating system.

Testing – Diagnostic testing, such as blower door for building air leakage and duct blaster testing for forced air systems leakage is part of the rating.

NOW HOW DO WE GET ALL THIS INTO [HUD] COMMUNITY PLANNING AND DEVELOPMENT'S HOUSING PROGRAMS?

Incorporate the following language into your RFP's or procurement process for housing:

“All new and gut rehabilitation residential building up to three stories shall be designed to meet the standard for Energy Star Qualified New Homes (≤ 80 [85 for South] and >70 on the HERS Rating Scale). All procedures used for this rating shall comply with National Home Energy Rating System guidelines.”

Believe it or not this is the only thing *you* have to do!
The developer takes care of the rest.
