State Capitol, Room 410, Albany, New York 12224

New York State Homes and Community Renewal Legislative Report on Appropriated Housing Plan Funds

Dear Colleagues,

Attached is the annual report summarizing the activities undertaken pursuant to the funding made available in the State's two, five-year Housing Programs covering SFY 2016-17 through SFY 2022-23. The report includes details on 313 supportive and affordable multifamily housing projects that received these funds. These projects represent more than \$14 billion of investment in supportive and affordable housing around New York State and are a significant step in the State's commitment to provide safe, high-quality affordable housing for its citizens. In addition, 72 awards were made through our single family and community renewal programs using these funds. These awards included grants to non-profits and local governments through programs administered through the Office of Community Renewal (OCR), 14 loans made through our small buildings program, \$4 million used to assist homeowners as part of our Neighborhood Revitalization Program, and over \$23 million awarded to multiple non-profit applicants in our Accessory Dwelling Unit (ADU) program

The multifamily projects listed in this report represent a total of 36,387 units of affordable housing across New York State. 122 of these projects have been completed and are currently occupied, 178 are under construction, and 13 have been awarded but not yet closed on their construction mortgage. A total of 32,745 of the multifamily units across 289 projects described in this report were funded with money appropriated for the first five-year Housing Plan. 3,604 units in 22 projects were funded with money appropriated for the second Housing Plan, including some projects that

included funds from both appropriations. A list of the buildings produced by these projects can be found in Appendix 1 – Building Addresses. The 72 projects and programs in the single family and community renewal portfolio represent an additional \$110 million investment by the State.

These projects represent the specific State capital funds noted above, which are an important subset of the agency’s ambitious second five-year Housing Plan. The total five-year Housing Plan also consists of other State capital resources and State and Federal tax credits and is designed to build or preserve 100,000 units of affordable housing. After our first successful plan which achieved its goal of developing 100,000 units for affordable and support housing, the State is again on track to meet its goal once again in the second plan which ended its first year with more than 19,000 units created and many more in the pipeline.

Many of these projects benefitted from public resources in addition to the funds appropriated pursuant to the Housing Program. These resources, as well as the private funding sources they leveraged, are catalogued in Appendix 2 – Funding Sources. As noted, these projects represent only those that received financing through the Housing Program appropriated funds and should not be taken to be a comprehensive list of the affordable housing and homeownership opportunities created by New York State Homes and Community Renewal’s efforts.

Sincerely,

RuthAnne Visnauskas

Commissioner

**New York State Homes and Community Renewal Legislative Report on Appropriated Housing Program Funds
Single Family Program Awards**

* Awards made through the New York Main Street's program include a mix of residential, commercial, and civic space. Only the residential units are counted here.

** To protect the identities of homebuyers assisted through its Homeownership and ADU programs, HCR has omitted individual loan details and provided a single-line summary of funds drawn to date.
