ADDENDUM
Request for Proposals ("RFP") for Biological Monitoring of Oyster Implementation for the Living Breakwaters Project

1. Addendum No. 1 - Issued on July 30, 2026

Amendment 1:

1. Section 14.4.3 of the RFP titled "Licenses, Certifications and other Credentials" is hereby amended as indicated below.

14.4.3 Licenses, Certifications and other Credentials

The Proposer must respond affirmatively that it, and its subcontractors (if any), will have, prior to commencement of work under the contract(s) resulting from this RFP, all necessary licenses, certifications, approvals, and other needed credentials to perform the Scope of Work in the RFP, if applicable. In accordance with the Scope of Services section of this RFP, the Biological Monitoring firm must possess:

- Scientific Diving Certification, American Academy of Underwater Sciences (AAUS) or equivalent scientific diving body to ensure compliance with specialized safety standards or respondents may propose alternative standards in their response and include information on how the proposed certifications/safety requirements meet or exceed those required by state/federal law for the scope of work requested.~~.~~

- Vessel Operator Licensing: As this monitoring requires the use of small vessels for disk retrieval and transect surveys, Contractor should ensure that all vessel operators hold a valid U.S. Coast Guard (USCG) Merchant Mariner Credential.
